THE HONGRONG & SHANGHAI BANKING CORPOBATION. LEGAL ADVISER:

THIS Company has been formed for the I purpose of carrying on the business of Cotton Spinning and Weaving at Shanghai. It is intended that the business should at first be confined to spinning, the original equipment for which will be not less than 40,000 Spindles. with Buildings, and Machinery. Weaving Machinery will be added afterwards. Sufficient Engine and Boiler power for both purposes wil

be installed at the outset. The Company, proposes to import the most approved Machinery, to acquire a suitable site, and to erect Mills for the manufacture of Cotton Yarns and Cloths best suited to the Chins

markets. As is well known the importation of Machinery by Foreigners has hitherto been officially obstructed but Chinese have been allowed to import Machinery under special permits, and Cotton Mills owned by them have been in successful operation for some years. At present, Mills comprising about 200,000 Spindles are either working or in an advanced stage at

China and Japan, the restriction on the importation of Machinery has been removed; and this field of industrial enterprise is now open to Foreigners and Chinese alike. It is confidently believed that there still axists an opening for more Cotton Mills here, and that their product will successfully compete with and ultimately supplant that brought from abourd.

Under the recently concluded Treaty between

much more extensive markets of China may be counted upon to consume a greatly increased The Cotton Mills in Japan operate some 900,000 Spindles, a very large proportion of the output of which is absorbed in that country. They draw their supplies of the raw material about equally from China and India and the United States. The difference in cost of the raw material grown in China would favour Mills here as compared with those in Japan to a very

considerable extent. The markets for the coarse Yarus in China have hitherto been chiefly supplied from India, whilst small but increasing imports of Japaness Yaras. have found a market here. The import of Indian Yayns during the past four years at Shang-HE Dividend deblared for the Half- hat alone averages over 195,000 bales of three Year ending 30th June last, at the Rate picule each annually, whilst the principal port of ONE POUND AND FIVE SHILLINGS STEELING in the South of China have taken during the and after MONDAY, the 12th instant, at the demand for Yaras in China might have been supplied with advantage to producer and consomer alike by locally established Mills, work- rates. ing cotton of home growth. An ample supply of Baw Cotton may be

counted upon, as the area of cultivation can be increased indefinitely to supply any increased As an example of the elasticity of the supply of Raw Cotton, the case of the United States DRED and FIFTY SHARES in this crop rose from 5,700,000 bales in 1884 5 to 9.039.000 bales in 1891-2. It fell to 6,717,000 10,831/10,950 cons crop will reach 9,850,000 bales, with a 10,931/10,960 range of prices the lowest ever recorded.

to be feared, whilst the competition of Indian and American oction in Japan will check an advance beyond normal prices in China-grown staple for Scoretary. 1668 that market, The supply of labour is limitless, and it is al-

ready demonstrated that the natives soon become skilled operatives. The market for Yarns is at our own doors, and may be expected to continue to expand indefinitely, as has been the case during the past SHARES numbered 7,751 to 7,755, standing preference in the market by reason of their TOYE, ROCKING HORSES, and DOLE HING, having been Declared LOST, Notice is Of the Shares subscribed for, a large part has

An important point in connection with the procedure at fire inquiries was raised at an inquiry on Tues lat held by the Hon. H. E. Workhouse. The case itself is still sub judice and it would be improper to express any opinion on its merits, nor, in fact, has the inquiry proceeded far enough to allow of an opinion being formed. The point of procedure, however, has nothing to do with the merits of the case and may fairly be ment. discussed. Prior to the passing of the Fire Inquiry Ordinance of 1888 fires had for some time been remarkably frequent and it was suspected that the greater number of them were due to the premises being purposely set on fire with a view to defrauding. Insurance Companies. It was believed been re-elected Speaker to the House of Com. | 315. that if an inquiry into the origin of each fire wage held it would exercise a wholesome check on the crime of incendiarism: This belief was justified by the result, for after the passing of the Ordinance there was a great falling off in the number of fires.. The whole object of the Ordinance was to provide a ready means of ascertaining whether attack the Mymie tribe. the fire was the result of crime, and it is provided that where, upon, consideration of the police report, the Magistrate is clearly THE CUSTOMS SEIZURE IN BRITIS! of opinion that the fire was caused by accident no inquiry need be held.
